

**Job Description:**

Spur Aviation Services, LC is a Part 135 wildland firefighting company located in the beautiful location of Twin Falls, Idaho. We are offering immediate openings for A&P and IA mechanics. As a certified aircraft mechanic, you will be responsible for maintaining and servicing Turbine and Piston aircraft throughout the year. While the large maintenance period occurs during the winter months, the summertime work consists of a combination of at home base and servicing aircraft on the road.

Company Benefits:

- Long – term stable work environment with a competitive salary (DOE)
- Health, Dental, and Vision insurance
- Retirement program
- Vacation
- 11 paid Holidays
- Sick
- Fringe Benefits (during contract season)
- Relocation package
- Incentive programs for interns and A&P certified mechanics

Job Requirements

- Airframe and Powerplant (A&P) License, 1-year minimum experience
- Work well as part of a team
- Work flexible hours during fires season and be on-call at various times
- Accomplish maintenance in an outdoor environment during fire season
- Some traveling and overnight stays during the fires season (amount of overnight stays are few)
- Come prepared with a basic assortment of industry standard tools

Desired but not required Qualifications and Skills:

- Pilot 's License
- Inspection Authorized (IA) rating
- Twin Commander maintenance experience
- Garrett engine maintenance experience (or at least turboprop engine maintenance experience)
- Pilatus PC-12 maintenance experience
- Pratt & Whitney Canada PT6A maintenance experience

Responsibilities:

- Typical maintenance operations, such as removal and replacement of aircraft and power plant components in accordance with Company Maintenance SOP, Manufacturer/OEM approved data
- Troubleshoot, repair, clean, service, inspect, modify, replace, overhaul aircraft and aircraft systems using approved data to ensure airworthiness
- Follow all applicable specifications to accomplish each specific task
- Develop work plans and meet schedule estimates
- Follow all safety procedures and specifications
- Complete all required paperwork, maintain proficient records of repairs
- Use and operate all equipment in a safe manner
- Communicate effectively with management and team members
- Requires flexible schedule, working nights and weekends when the job requires (during fire season).

Pay:

Competitive wage above industry stand but depends on experience

How to apply:

Please submit a resume for immediate consideration. Only those candidates invited for an interview will be contacted. Employment at Spur Aviation is contingent upon the successful completion of a comprehensive background check, drug screening, and a current physical.

We are a proud Equal Opportunity Employer.

Job Type: Full-time
